

North American Systems International

Founded in 1993, North American Systems has evolved from an IBM midrange shop to a full-service \$40 million IT solution provider. Our experienced team of 7 sales engineers, 20 top-notch account executives and 5 outside consultants, carefully chosen business partners like Oracle and IBM, and a customer-centric focus, has helped ensure our continued success in the marketplace.

North American Systems International offers a wide variety of computer hardware from industry-leading manufacturers. If you are searching for fully-configured systems or spares and upgrades for legacy & EOL equipment, NASI has a variety of options to choose from, including authorized new, unused, off-lease, refurbished, and bulk-packed hardware.

We source equipment from all over the world, and store approximately \$1-2 million in inventory in our 5,000 square foot warehouse at any time, to provide buyers with industry-best pricing. Our inventory also allows us to fulfill customer orders quickly with products cleaned and tested by NASI engineers before they leave the loading dock. All equipment is guaranteed to fall under your existing IT maintenance contract, and with a Dun & Bradstreet listing, numerous credit references, and a large portfolio of satisfied, long-term customers, North American Systems takes the risk out of purchasing remanufactured equipment.

Products

- Servers, storage, networking
- IBM
- HP
- Sun
- Cisco
- Hitachi Data Systems

In addition to configuration guidance and installation and implementation services, North American Systems International offers much more to help IT departments minimize TCO, by reducing operating expenses in addition to capital expenses. We offer cost-effective third-party maintenance solutions designed to reduce complexity while gaining volume discounts for heterogeneous environments, putting entire IT infrastructures under a unified contract and oftentimes allowing end-of-support-life product to qualify for maintenance after the manufacturer refuses to.
